

Basin heaters

Spare parts guide

Basin heaters

- Our factory-installed heaters keep the water temperature at 4°C and act as a simple and economical **anti-freeze measure for the basin water**.
- The heater package includes the **heaters**, a **thermostat** and a **low level cut out switch** to protect the heaters if the water level declines excessively.
- Standard electric heaters can handle ambient temperatures down to -18°C.
- All heaters and components are furnished with **weather-tight enclosures**.

Prevention tip !

Ensure the thermostat set point is properly set to prevent unnecessary energy consumption.

The setpoint should be $\pm 4^{\circ}\text{C}$. Improper set points may result in year round operation of the heater package, even during summer time, causing increased energy consumption.
