

Options and Accessories

Adiabatic cooling

Options and Accessories

Below is a listing of the main TRF options and accessories. If your required option or accessory is not listed, look no further than your [local BAC representative](#).

Flanges facilitate **piping connections** on-site.

Increase the coil's resistance against a harsh atmosphere.

Allow for operation without any anti-freeze agents and avoid a coil freeze-up risk at the same time.

Reducing noise at air **intake and discharge points** brings us closed to silent cooling equipment.

Increase the degree of redundancy, providing a higher backup capacity for your installation.

The recirculation pump helps to further cut down on water consumption.

This option integrates the adiabatic cooler's control system in your BMS system.

Cuts power to motor with **safety in mind** during inspection or maintenance.

Motor removal davit

For **easy removal or lifting** of the side motor.

Ladder

A ladder to **facilitate access to the top of the unit** and safe inspection of your cooler.
